

## History

The Amplimesh® security grille is an original Australian innovation that is patented around the world.

Amplimesh® was originally promoted in the 1970s and the name is recognised by many as the best in aluminium and stainless steel security. It's easy to see why, over the last thirty years, more than one million Australians have chosen Amplimesh® to secure their homes. Amplimesh® security doors and window screens are clearly Australia's first choice in keeping homes safe and secure.

Be assured we have choices to fit every budget as well as the widest range of security products.

## Australian Standards

All Amplimesh® Security Products have been tested to conform with AS 5039 and AS 5041, which are the Australian Government Standards for the security products industry.

Our products have been tested using strong extruded corner stakes, stainless steel rivets and strong three point locks. These features in a security door are important, as without them a security door is unlikely to pass the rigorous testing carried out to pass the relevant Australian Standards.

## Some expert advice

When considering high end window and door security for your home, stainless steel mesh is an exceptional solution as it is the most non-obtrusive barrier protection available. But it is important to know there are differing qualities of stainless steel mesh, some far more suited to the harsh Australian environment.

Equally important is the assembly method used to secure the mesh into the door frame as this can promote or eliminate galvanic corrosion.

Buying ClearGuard ensures your home is protected by the most superior security products on the market.

## Coated in Nature

Bush Cherry

Would you like the look and feel of timber on your security door or window screens without the maintenance, painting or sealing required on most timber products? If the answer is yes, then ClearGuard®'s new product that combines the natural beauty of wood with the durability of aluminium will appeal.

Snow Gum

The natural beauty of wood grain is photographically reproduced using a unique powder coating process on the ClearGuard® frame which provides you with a the look of a timber frame without the ongoing maintenance of real timber.

Western Red Cedar

Aluminium is not subject to warping, splitting or cracking and therefore is an ideal alternative to timber. This process uses the latest technology from Europe and we encourage you to ask your local Amplimesh® dealer for further details.

## Amplimesh® Dealers - located throughout Australia

**Crane Aluminium Systems**

Amplimesh®, ClearGuard®, Sharkurity® and Pointer™ are trademarks of Crane Aluminium Systems.

Amplimesh® Systems are sold through a network of authorised Amplimesh® dealers managed by Crane Aluminium Systems.

## ClearGuard® Security Door

ClearGuard® may look like a flyscreen, but it is actually high tensile marine grade 316 stainless steel woven into a fine mesh. The strength and composition of the mesh removes the need for security grilles on your doors and windows.

ClearGuard® provides a welcoming entrance for your visitors, without compromising the appearance of your home or feature door. It gives

you a clear, unobstructed view of your garden and the outdoors and lets the cool breezes flow through your home.

ClearGuard® is assembled using a unique, patented pressure process that eliminates the need for screws, rivets, pins or snap ins. The process ensures that no metal surfaces come into contact with each other, eliminating the possibility of corrosion.

A special pressure fitting process of placing the stainless steel mesh into the

frame removes the need for unsightly mid rails.

The heavy duty frame and corner stakes are matched with a heavy duty door closer and three point locks, located at top, centre and bottom.

## ClearGuard® Security Window Screen

ClearGuard® is also ideal for providing security screens for your windows. This is an extra layer of protection for you and your family.

## ClearGuard® 10-Year Warranty

Claims under the warranty are only valid if:

- The fault occurs within 10 years of installation
- All servicing of the door has been carried out by an Authorised Dealer or their representative

- No modifications have been made to the original ClearGuard® product
- The care and maintenance instructions have been followed
- The product has not been damaged by fire, accident, or abuse

Items not covered by this warranty include locks, handles, cylinders, hinges, and door closers, which are separately covered by manufacturer's warranties.
